### **Election/Restrictions**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-8, drawn to a modulate aptamer.

Group 2, claim(s) 9-14, drawn to a method of detecting a target protein.

Group 3, claim(s) 15-18, drawn to a kit.

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups 1-3 appears to be that they all relate to a modulate aptamer comprising two complementary oligonucleotide chains.

However, Shi et al (U.S. Patent No. 6,458,559, filed 22 April 1999) teaches the claimed aptamer (Column 13, line 42-Column 14, line 40).

Therefore, the technical feature linking Groups 1-3 does not constitute a special technical feature as defined by PCT Rule 13.2.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
